Robert S. Marvin, Ph.D. Director, The Ainsworth Attachment Clinic and Circle of Security<sup>®</sup> Network & Professor Emeritus, The University of Virginia School of Medicine Research Professor, Department of Psychology, The University of Virginia

Dr. Bob Marvin is a child and family clinical psychologist and research scientist who has been working with young children since he was an undergraduate. His specialty is children and their caregivers where there has been a disruption in the child's family relationships during the early years of the child's life: separation of the child's parents, maltreatment by caregivers, and children in the foster care or adoption systems. He is currently Professor Emeritus in the School of Medicine and Research Professor in the Department of Psychology. He is also the founder and director of the Ainsworth Attachment Clinic and Circle of Security<sup>®</sup> Network in Charlottesville, Virginia. Throughout his career, Bob has been active in basic and clinical attachment research, and research with families who have children with chronic medical conditions and/or histories of problematic or disrupted early relationships. With a variety of colleagues, he has developed and tested numerous attachment-related procedures that are used in basic and clinical research, and in clinical practice. He has written and co-authored more than 75 articles, books, and film documentaries on this work.
